EDUCATION

Sri Gayatri jr collage

intermediate

Percentage - 90.1

NAD, visakhapatnam

2021 - 2023

Gitam University

B.Tech Computer Science and Engineering
CGPA - 8.87

visakhapatnam, Andhra Pradesh

2023 - 2027

EXPERIENCE

Cybersecurity Intern

August - september 2024

Teachnook

- Gained hands-on experience in cybersecurity principles and practices
- Worked on ethical hacking, network security, and threat detection
- Completed various cybersecurity challenges and case studies

Bug Bounty Hunter

2024 - present

Self-Driven

- Identified and responsibly disclosed an HTML Injection vulnerability on a high-traffic Premier League football club website.
- Identified and responsibly disclosed security vulnerabilities in websites.
- Gained hands-on knowledge of common web vulnerabilities: HTML Injection, XSS, CSRF, SQL Injection, and Open Redirects
- Practiced identifying and testing for security flaws using tools like Burp Suite.

Satellite-Based Air Quality Analysis

2024 - 2025

Google Earth Engine — MODIS — MERRA-2

- Processed MODIS MAIAC (1 km) AOD data and derived PM2.5 using aerosol scaling models.
- Analyzed MERRA-2 PM2.5 and Black Carbon ($0.5^\circ \times 0.625^\circ$) for regional trend comparison.
- Built automated scripts for time-series generation, spatial clipping, and district-level comparison.

PROJECTS

Granthalaya - Smart Library System |

March 2025

- Developing a full-stack library management system.
- Implemented dashboards using Chart.js and FullCalendar.
- Added search, sorting, and barcode-based book tracking.

LinkShield - Android URL Security Application | *Android, Cybersecurity*

April - December 2025

- Built an Android app to intercept and analyze URLs before opening.
- Detected phishing and malicious links using real-time heuristic and content-based checks.
- Automatically blocked unsafe links and safely redirected trusted URLs.
- Added Allowlist and Scan History for user control and transparency.

Advanced AES-256 File Encryption Tool | *Python, Cryptography*

December 2025

- Developed a secure file encryption tool using AES-256 for file-level data protection.
- Implemented secure key derivation using PBKDF2-HMAC-SHA256 with random salt and IV.
- Ensured strong cryptographic practices and secure encryption workflows.
- Built a user-friendly GUI in Python following secure coding standards.

TECHNICAL SKILLS

Cybersecurity Skills: Bug Hunting, Phishing Attack Analysis, DDoS Attack Awareness, Location Tracking Analysis

Programming Languages: Java (Intermediate), Python (Basic), C

Web Technologies: HTML, CSS, JavaScript

Developer Tools: Git, VS Code
